Vacancy Notice – IT Systems Administrator

Cobham Gaisler

Cobham Gaisler (subsidiary to Cobham plc.) is based in Gothenburg, Sweden, and is a leading provider of fault-tolerant microprocessor systems for the space industry. The main products of the company are the LEON line of microprocessors and the GRLIB IP library used for System-on-Chip (SoC) solutions. In addition, support services, in-house development tools and software targeting the company's processors are developed and provided by Cobham Gaisler. Our customers are found across the globe, mainly within aerospace but also on the commercial side. For more information about us, please visit www.cobham.com/Gaisler.

Job description

In your role as a IT systems administrator you will be responsible for coordinating, managing, and improving our Linux and Windows workstations, shared servers, and network infrastructure. This means supporting and follow up on IT issues and proposing new approaches and services that would improve the daily work of your new colleagues. The responsibilities also include procurement of equipment, software, and external services.

Most of the services are standard services like web and IMAP servers, LDAP, Active Directory, NFS etc. and some of the services provided by the IT infrastructure are related to the technical work performed by the hardware and software design teams. Such services could for example be EDA tools, automated testing services built around Jenkins/Docker and specific toolchains at our build servers.

While the day-to-day work consists of managing the infrastructure located at the office in Göteborg, the work also entails conforming to company policies and collaboration with other parts of Cobham. As part of this, short durations of international travel may be required.

Qualifications

We are looking for candidates with at least two years of applicable hands-on experience within Unix/Linux and Windows server and workstation management. We require good verbal communication skills in English, a strong general interest in new IT technologies and a solution oriented mindset. Key assets:

- Installing, upgrading, monitoring, and automated management of Linux and Windows servers and workstations
- Hands-on experience with networking
- Values the importance of security solutions
- Knows the difference between incremental backups and mirroring
- Takes initiative and possesses good problem solving skills
- A helping attitude

Location

Gothenburg, Sweden.

Application

CV and cover letter are sent to career@gaisler.com, with subject "IT Systems Administrator: “ and your full name.
